CONSTRUCTION STATUS OF SOVIET SINGLE SILO ICBM SITES [redacted] 25X1

The Tyuratam Missile Test Center, four deployed Type III-C and four deployed Type III-D ICBM complexes were covered by [redacted] X1 With but one exception, the quality of the photography ranged from poor to fair over these complexes.

The current construction status of each site is shown on Figures 1 through 18. Eight Type III-C and six Type III-D sites were newly identified.

Items of particular interest are as follows:

(1) Another Type III-C site was begun at the Tyuratam Missile Test Center about mid-August. Nearby scarring and track activity present at that time indicate that two more of these sites may have been started simultaneously and were obscured by clouds on [redacted] 25X1

(2) A new round of construction activity (Five new sites) was observed at the Aleysk ICBM complex. Work on these sites probably began very near mid-year.

(3) No control sites have as yet been identified at Perm or Gladkaya, nor is it possible to distinguish covers on those Type III-D silos which, in all other respects, appear outwardly complete.
